

Organised Garage Checklist

The garage houses heavy-duty equipment so it makes sense that you require a heavy-duty organisation solution. We created our Organised Garage Checklist to give you our top tips on how to keep this space neat, tidy and easy to access.

- 
- Functionality** - Creating a functional workspace with practical storage is essential to the organisation of your garage. With Elfa, you can design a unit to suit your garage shape and storage needs.
 - Clear it out** - The garage can become a dumping ground for unused junk. Sort through it and be ruthless about what you really need. As a rule of thumb, if you haven't used it in over 6 months, throw it out!
 - Storage** - Once you've worked out what you want to keep, store it properly. Protect items from dust and choose storage boxes that are stackable with locking lids to save on space.
 - Wall space** - To make sure you're utilising all your space, wall mounted racks are a great storage solution. We have a great range for products including the Racor Multi-rack for bulky items and the Racor Garage Pro to store your hose, rake and broom.
 - Labeling is key** - When you're storing numerous items for all the family, it's easy to forget what is what and where things are stored, so label everything!
 - Separate your sports equipment** - Keep your sports equipment safe and easy to access with individual racks like the Tennis Rack, Bike Rack and Golf Bag Rack.
 - Toolkits** - Create toolkits for easy accessibility, for example, a 'home' for your gardening tools, a car wash kit or a wall repair kit.
